Summary

Senior **UI** and Full Stack Engineer with over **10** years of experience in architecting and maintaining high-scale enterprise cloud systems. Proficient in **React**, Preact, Node.js, and React Native, with a strong history of leading framework migrations and creating reusable UI templates. Skilled in leveraging Grafana and Power BI for operational insights and enhancing developer workflows through **GenAI** Integrations.

Skills

- React
- Cross-platform solutions
- Android
- Full stack development
- AI integration & Generative AI
- React Native
- UI automation
- Data analysis techniques

Experience

ORACLE India Private Ltd , <i>Senior Member of Technical Staff</i> • Managed daily operations and incident resolution as on-call engineer for critical OCI cloud Interfaces using React and Preact. • Led successful migration from legacy React to Preact, reducing bundle sizes and enhancing UI loading performance. • Designed reusable custom UI templates (Maul) for standardized workflows, ensuring sleek user- friendly interfaces. • Engineered robust end-to-end automation scripts and functional test suites validating stability of core Maul templates. • Developed 'Maul Assistant' AI tool, Integrating artificial Intelligence into internal developer workflows. • Built and optimized comprehensive Grafana dashboards for all UI deployments, improving performance monitoring and uptime metrics.	02/2025 – Present Bengaluru
CISCO SYSTEMS INDIA PVT LTD , <i>Software Engineer</i> • Played a pivotal role as a UI developer (React, Cypress, React test library, Jest) for Catalyst Center - Wireless Controller Management, ensuring a sleek and user-friendly interface for efficient management of wireless controllers. • Demonstrated versatility as a Full Stack Developer, leading the development of an automation run dashboard using React and Node.js. Successfully integrated front-end and back-end components to deliver a seamless and efficient dashboard for automation processes. • Excelled as a React Native developer for the User Defined Network (UDN), contribution to the seamless integration and functionality of the platform. • Drove impact insights as a Power BI developer, creating and optimizing dashboards for all Wireless and App hosting projects, enhancing data visualization and decision-making processes. • Developed automated scripts to simplify common tasks and reduce manual effort	07/2018 – 01/2025 Bengaluru
Compassites Software Solutions , <i>Associate Software Engineer</i> • Spearheaded Android development for a diverse array of projects, including the acclaimed MagicBricks Agent Smart Diary, Myntra Delivery(Android App), mfine, and Azure Power (React-Native App). • Led the charge on innovative Internet of Things (IoT, Python) initiatives, such as Medicine Reminder kit and the implementation of Face Detection and Tracking systems.	04/2016 – 07/2018 Bengaluru

Education

Bachelor of Engineering in Electronics and Communication, <i>VISVESVARAYA TECHNOLOGICAL UNIVERSITY</i>	Belagavi
JAVA, <i>ABC for Java and Testing</i>	Bengaluru
